

# CYBERSECURITY CONFORMITY ASSESSMENT SERVICES

We provide independent security assessments of your systems, assets and products against recognized standards.

## INDUSTRIAL ASSETS (OT)

*Assess and certify the cybersecurity maturity level of critical infrastructure and equipment*

- **Risk and gap analysis** of the cyber resilience of a system or a site
- **IEC 62443 & NIST SP 800-82** -based assessments and certifications
- **Network and Information Security (NIS)** directive compliance
- **Supplier assessment** against client policies
- **IT/OT systems vulnerabilities analysis** (Penetration Testing, Red Teaming)
- **Cybersecurity class notations and equipment certification** for the Maritime industry

## PEOPLE

*Develop employee cyber risk awareness programs and change behavior*

- **Security awareness & behavior**
- **Psychology in cybersecurity**
- **Social engineering/phishing**
- **Various dedicated training courses**

## IT SYSTEMS

*Test, audit, certify the cybersecurity of systems*

- **Management system certification and audit against global standards** (ISO 27k, NIST CSF, NEN 7510, GDPR)
- **Enterprise cybersecurity maturity level assessment** (internal, vendors)
- **Cloud security** (OWASP/CSA/CIS)
- **Systems vulnerabilities analysis** (Penetration Testing, ASVS, Red Teaming, SIEM/SOC Testing)
- **Forensic readiness**

## CONNECTED PRODUCTS (IOT)

*Test and certify the cyber resilience of connected devices according to their criticality*

- **IoT product cybersecurity certification scheme** (BV labels from substantial to basic, ETSI EN 303 645)
- **Common Criteria certification**
- **UNECE cybersecurity/ SW updates regulations gap analysis and type approval**
- **Medical devices cyber assessment** (ANSI/UL 2900)
- **Product vulnerability and protocol implementation automated analysis** (P-SCAN)
