- (1.5)% in International Trade due to a volume decrease on some commodity inspection contracts in Africa and South-East Asia
Positive currency impact of 2.2%
Outlook

缛 Bureau Veritas' business should continue to grow in 2009, albeit at a slower pace than in 2008:

- Single digit organic growth expected for FY 2009

- Operating margin will improve on the back of the:
  - ongoing roll-out of cost-control and production process improvement programmes
  - growth in the Group's most profitable divisions

缛 Bureau Veritas' resilience is due to the mandatory and periodic nature of the majority of its businesses, as well as the diversity of its business portfolio and the existence of structural factors such as the strengthening of regulations, the privatization and the outsourcing of control and inspection operations
